

BONUS IRA ACCOUNT

Effective January 2, 2019.

Rate Information - The dividend rate on your term share account is _____% with an annual percentage yield of _____%. The dividend rate and annual percentage yield may change at any time, as determined by the credit union board of directors.

Compounding frequency - Dividends will be compounded every month.

Crediting frequency - Dividends will be credited to your account every month.

Dividend period - For this account type, the dividend period is monthly, for example, the beginning date of the first dividend period of the calendar year is January 1, and the ending date of such dividend period is January 31. All other dividend periods follow this same pattern of dates. The dividend declaration date is the last day of the dividend period, and for the example above is January 31.

Minimum balance requirements:

No minimum balance requirements apply to this account.

Daily balance computation method - Dividends are calculated by the daily balance method which applies a daily periodic rate to the balance in the account each day.

Accrual of dividends on noncash deposits - Dividends will begin to accrue on the business day you place noncash items (for example, checks) to your account.

Transaction limitations:

You may make unlimited additions into your account. You may make withdrawals of principal from your account before maturity only if we agree at the time you request the withdrawal. Principal withdrawn before maturity is included in the amount subject to early withdrawal penalty. You cannot withdraw dividends from your account before maturity without penalty.

Time requirements - Your account will mature December 31.

Callable account - We may redeem this account, at our option, at any time.

Early withdrawal penalties (a penalty may be imposed for withdrawals before maturity) -

The penalty we may impose will equal 90 days dividends on the amount withdrawn subject to penalty.

In certain circumstances such as the death or incompetence of an owner of this account, the law permits, or in some cases requires, the waiver of the early withdrawal penalty. Other exceptions may also apply, for example, if this is part of an IRA or other tax-deferred savings plan. For any account which earns a dividend rate that may vary from time to time during the term, the dividend rate we will use to calculate this early withdrawal penalty will be the dividend rate in effect at the time of the withdrawal.

Withdrawal of dividends prior to maturity - The annual percentage yield is based on an assumption that dividends will remain in the account until maturity. A withdrawal will reduce earnings.

Non-automatically renewable account - This account will not automatically renew at maturity. Your funds will be placed in a dividend-bearing account.
